COMMUNIST CHINA

A reliable source reports the following electronic installations near Canton.

1. Communications site and possible direction finding station (2307 N 11309 E), approximately 4 nautical miles SW of Canton, consisting of 5 single-bay fishbone antennas in a circular array, several small possible "V" type antennas and a possible radio direction finder. The operations and receiving facility is reported to contain two buildings within a walled enclosure. A support facility is adjacent in a separate walled enclosure and is reported to contain 10 buildings and an observation tower.

2. YEN PU communications facility (2305 N 11310 E), 2 nautical miles SE of above site, with 2 offset rows of 3 poles each and 3 possible "V" type antennas.
